Mantz Automation is pleased to offer mold sampling and short-run production to help locally support our fellow mold makers and customers. Partnerships have always been a key factor in business so we offer a vast range of presses along with all the supporting equipment to aide in your sampling or short-run needs.

Equipment List

- 220-ton Haitian with RJG
- 530-ton Haitian with RJG and robot
- 730-ton Haitian with RJG and robot
- 900-ton Haitian with RJG and robot
- 1120-ton Haitian with RJG and robot **(2)**
- 55-ton Milacron
- 60-ton JSW
- 80-ton JSW **(2)**
- 85-ton JSW
- 110-ton JSW **(2)**
- 140-ton JSW
- RJG E-dart
- Resin dryers
- State of the art water system
- Multi-zone controllers for any hot system requirements
- Hydraulic or pneumatic valve gate options
- Multi-material colorant mixer
- Hot water heater, able to heat to approximately 350 degrees.

Why Having Injection Molding Presses In-House Matters

Faster Turnaround

- We can sample new molds immediately after they're built, without waiting for shipment to another facility. That means quicker validation and faster time-to-market for your parts.

Better Quality Control

- Running molds in-house allows our team to fine-tune tooling, troubleshoot issues, and optimize processing conditions before molds ever leave our shop. You receive a tool that's production-ready.

Reduced Costs

- Eliminating the need to ship molds back and forth for testing saves on freight, handling, and downtime. It also minimizes risk of damage during transport.

Efficient Engineering Feedback

- Because our toolmakers, engineers, and press operators work side by side, adjustments can be made on the spot. This collaboration reduces revisions, prevents delays, and ensures your mold performs exactly as intended.

Confidence in Your Tool

- When you receive your mold, you know it has already been tested under real-world conditions in our presses—so you can go straight into production with confidence.

Mold Sampling Pricing

We will provide you first-run parts and a set-up sheet to act as a baseline, saving time and money upon initial receipt of your new tool.

Mold sampling pricing includes mold set-up / mold removal, 5 hours of press time, and use of any of the above-mentioned equipment. Mold pickup and delivery also available.

Please call or email for a free quote! Prices are subject to discussion. NDA's will willingly be in place.

Production Molding

We offer quick-turn arounds with shortened competitive lead times for short part runs in the event your press schedule is full and cannot accommodate.

Please call or email for a free quote! NDA's will willingly be in place.

Press Details

Please request press specifications brochure for specific sizing information on each of the above mentioned presses.
